

**INSTRUCTIONS FOR USE OF AN ABLENET CONTROL BOX**

1. Plug Control Box into wall socket.
2. Plug switch into the small socket just above the dial on face of Control Box.
3. Plug the electrical appliance into one of the two electrical sockets on the Control Box face. NOTE !! You are able to plug in and use two electrical appliances simultaneously, by plugging each appliance into a electrical socket on the face of the Box.
4. The Dial on the Box = Turn the dial in an anti-clockwise direction. The numbers indicate the amount of time in minutes for which you want the appliance to operate.
5. Turn the appliance on.
6. Check once more you have all the plugs in the correct sockets.
7. Hit the switch once, to activate the process. The switch should now be operating the appliance.
8. The appliance will play for the amount of time you designated on the Control Box dial. When the time is exhausted, the appliance will stop and only start again, upon re-activation of the switch.
