

## Directions For Vocabulary Data Collection

### Obtaining a Baseline

Gather 10 pictures that you know the student knows the name of

Have the student pick one, but close your eyes so you can't see what's picked

Ask student to tell you what has been picked

Record whether or not you could understand the word over 3 successive days

Carry this procedure out over 3 successive days

Keep these pictures to used as probes

### Measuring Progress by Taking Probes

In about a month after starting this procedure, take another probe

Use the 10 pictures that you used before in the baseline measure

Same procedure as in baseline

Take probes monthly
