

Personal Planning For Your student

Plan of implementation for...

- **1st week** (think of one way for your student to use the voice output in the classroom each day?)

- **2nd week** (classroom activity where your student uses the voice output or AbleNet Powerlink with the class at least once during the week - what might the activity be?)

- **3rd week** (add another daily activity where your student can use voice output with the class)

- **4th week** (select an activity that your student can do with a pull-out group using voice output or the AbleNet Powerlink)

- **5th week** (choose an activity you can try with a friendship group)

- **6th week** (add a job to your student's activity that might occur in the school at large, a neighbourhood or in the classroom, where your student can practice a skill)
