

The Triptico Web-Site <http://www.triptico.co.uk/> has several activities that can be adapted for use with a single switch:

- Name Selector: Up to 32 names can be used. When the student hits the switch there will be a random selection of one of the names. To add some suspense, the selector chooses 5 names, then 4, then 3, until only 1 name is left.
- Group Selector: When the student activates the switch, a list of names is sorted into 3 or 4 groups instantly.
- Spotlight: when the student activates the switch, a photo or image is partially exposed, and is gradually revealed. Students can guess what the picture will be.
- Spinner: When the student activates the switch, the spinner randomly selects from one of 16 options.
- Four Option Spinner: Same as Spinner, only with 4 options
- Eight Label Spinner: Same as Spinner, only with 8 options
- Double Spinner: Same as Spinner, only with 2 spinners, each with 8 options.
- Probability Spinner: Used to teach probability in mathematics.
- MatchIt! Student activates the switch to select word cards to match.
- Scoreboard: When the student activates the switch, it adds a point to a team's score. Can have up to 6 teams.
- Pairs: Student and partner can use the single switch to turn over picture cards and find matches.
- Role Selector: When the switch is activated, a student or group of students is allocated to a role.
- Simple Timer: Student activates the switch to count down the number of seconds to complete a task.
