

Criteria For Creating Templates To Track Student Performance

- student name: other data – grade, age
- purpose of the data collection (learning outcome being measured)
- recorder (name, initials)
- goal area; long term goal; specific learning objective
- measurement: baseline
- legend/key for: kinds of support
- location
- activity
- date; time period
- supports: kinds of prompts

Sometimes it is helpful to have a helper record data for a testing task. Here the assistant is testing choice making skills while the SLP records the data. (e.g., Look at the book).
